Worked on improving the value of privacy notifications using

social and contextual cues.

Created a tool that lets lay people learn strong, randomly-

assigned passwords with computer-assisted mnemonics.

Analyzed how security tools diffuse through social networks and

ran an experiment using social cues to improve security tool

adoption.

Defined, implemented and conducted a large-scale analysis of

"self-censorship" on Facebook.

Ran a large-scale analysis associating pro-social behavior in a

popular shooter game with retention and other metrics.
